EDUCATION

- **Stevens Institute of Technology** Hoboken, NJ
Bachelor of Science in Computer Science *Sep. 2016 - May 2020*

WORK EXPERIENCE

- **Allvue Systems** New York, NY
Application Engineer, Operations *July 2020 - Present*
 - Resolved errors in SQL procs, XML data, and XSLT configs with XPath and SQL debugging queries.
 - Designed scripts to resolve trade and B2B data inconsistencies in client production environments.
 - Improved ticket prioritization process by implementing Salesforce database searching functionality.
- **New Jersey Innovation Institute** Newark, NJ
Project Assistant and Consultant, Innovation Services *June 2019 - Aug. 2019*
 - Created the project prioritization system for incubation of high ROI solutions within physician networks, securing a \$1,000,000 contract.

PROJECTS

- **ExerciseShare (exercise-share.netlify.app)** Haledon, NJ
React, Redux, Express, MongoDB, Node.JS, Material UI, JSON Web Token (JWT) *March 2022*
 - Built and maintaining a fullstack exercise sharing website with over 15 current users.
 - Utilized Redux to manage state between server and client for creating, editing, and commenting on posts.
 - Implemented JSON Web Token Auth and Google OAuth 2.0 for secure user sign-in.
 - Created search and recommendation system to both manually and automatically curate posts for users.
 - Setup automatic production deployment through Netlify and backend hosting with Heroku.
- **Workout Split Planner (exercise-planner.vercel.app)** Haledon, NJ
React, Material UI, react-beautiful-dnd, recharts, ExerciseDB API *January 2022*
 - Deployed and managing an interactive weekly exercise routine planner and optimizer.
 - Modified drag-and-drop library into controlled components to manipulate all states efficiently using hooks.
 - Utilized memoization to reduce render lag during client-side state updates.
 - Implemented recharts library to visualize aggregated routine data using composed graphs.
- **Stevens Shuttle System** Hoboken, NJ
React, AWS Lambda, MongoDB *August 2019 - May 2020*
 - Collaborated with students on Senior Design Project to create a user-friendly bus schedule application, increasing arrival time accuracy from 20 to 98 percent.
 - Exercised AWS Lambda operations to compile raw location data from third party bus API.
 - Utilized unsupervised machine learning to group bus data and predict arrivals within 2 minutes.

TECHNICAL SKILLS

Languages	JavaScript, Java, Python, TypeScript, SQL, GraphQL, C#, XSLT, XML
Technologies & Libraries	React, Redux, Node.js, Express, REST APIs, HTML, CSS, AWS Lambda
Tools	SQL Server Management Studio, Webstorm, Git, Docker, Kubernetes
Databases	MySQL, MongoDB, Redis, PostgreSQL
